Fastener Distributor Index – May 2018

Written by R.W. Baird analyst David J. Manthey, CFA 6/7/18

Key Takeaway:
The seasonally-adjusted FDI for May 2018 was 56.6, continuing the YTD theme of a modest m/m deceleration, while still remaining well in expansionary territory. Selling conditions similarly moderated, with the seasonally-adjusted sales index coming in at 61.2 vs. 63.0 in April. Qualitative commentary on demand remains positive, and increasingly inflationary pressures from raw material increases/tariffs were again a common theme across respondent commentary. The six-month outlook remains strong overall, and the Forward-Looking Indicator was essentially unchanged m/m at 58.8 (April 58.9).

Key Points:
About the Fastener Distributor Index (FDI). The FDI is a monthly survey of North American fastener distributors, conducted with the FCH Sourcing Network, the National Fastener Distributors Association, and Baird. It offers insights into current fastener industry trends/outlooks. Similarly, the Forward-Looking Indicator (FLI) is based on a weighted average of four forward-looking inputs from the FDI survey. This indicator is designed to provide directional perspective on future expectations for fastener market conditions. As diffusion indexes, values above 50.0 signal strength, while readings below 50.0 signal weakness. Over time, results should be directly relevant to Fastenal (FAST) and broadly relevant to other industrial distributors such as W.W. Grainger (GWW) and MSC Industrial (MSM).

May FDI down slightly. The seasonally-adjusted May FDI (56.6) moderated m/m vs. April’s 57.4 reading, consistent with YTD trends (fourth straight month of deceleration, albeit off of a very high 60.8 January reading to start the year). In the May survey, 54% of respondents indicated sales were “better” relative to seasonal expectations vs. 56% in April. This produced a seasonally adjusted sales index of 61.2 (April 63.0). Pricing gains were again noted by a large majority of respondents, with 75% of respondents seeing higher prices y/y (and 50% m/m) vs. 81% in April. For perspective on the strength of pricing in May – only 20% of respondents reported higher pricing at the low point in March of 2016. The resulting FDI pricing index of 87.5 came down just slightly off of April’s record 89.1 reading. Several respondents again commented on inflationary pressures in the channel, with one comment indicating material distributors are seemingly using tariffs to justify price increases even on products not affected by tariffs. Regarding customer inventories, a majority of respondents continue to view inventory levels as in line with expectations (68% of responses), 29% believe customers’ inventories are too low, and just 4% see inventory levels as too high. This was fairly consistent with April (63% in line, 31% too low, and 6% too high).

May FLI steady m/m. The seasonally-adjusted FLI was essentially unchanged m/m, registering 58.8 in May vs. 58.9 in April, as a slightly better employment index was offset by a modestly lower six month outlook. At 58.8, the FLI remains well into expansionary territory and is only slightly below averages seen across 2017 (60.9). Given solidly-expansionary FDI and FLI readings, we believe market conditions are likely to remain in growth mode (albeit potentially moderating growth) in the coming months.
Manufacturing employment improves slightly. Hiring sentiment improved this month among survey respondents. 32% of respondents saw higher employment levels in May relative to seasonal expectations vs. 19% in April, while 57% saw employment as in line (April 81%). The resulting FDI Employment Index was 60.7, up vs. April’s 59.4 reading. The May US jobs report was similarly better than expected with +223,000 jobs added (+188,000 expected) and the unemployment rate ticked down to 3.8% (3.9% expected), an 18 year low. May’s largest gains were registered in retail trade, health care, and construction. Manufacturing employment continues to trend upwards (+18,000 jobs in May), with most of the gains again coming from durable goods manufacturing (machinery +6,000). Total manufacturing jobs added over the past year now stands at +259,000, with 75% of the growth coming from durable goods industries. Average hours per work week for manufacturing employees decreased slightly at 40.8 hours (vs. April 41.1).

May sentiment mostly positive. Commentary from respondents skewed positive overall again this quarter. According to several participants, demand remains strong, with one respondent indicating “open orders are up 39% compared to last year at this time.” Another distributor highlighted construction as a particularly strong end market, saying “Watch the markets on cement companies and contractors. Their demand is going way up nationwide. Time to get in!” Steel tariffs and global trade remain topics of heavy discussion in the industry. One respondent indicated that they “still [have] concerns over the Chinese tariffs if they go through!” Inflationary pressures from raw material increases and steel/aluminum tariffs are increasingly evident in the channel. One distributor commented on this by saying, “Material prices in general are up, and some material distributors may take advantage of the situation and raise other material prices not subject to tariffs [i.e.] brass.” Quantitatively, survey data points to sustained momentum expected through 2018, with 50% of respondents expecting higher activity levels over the next six months and 43% expecting similar activity.

Fastenal reported May daily sales growth of 12.5% y/y, above our 11.5% estimate and again reflecting growth in all end markets/product lines. Underlying “core” growth (excluding foreign exchange) was 12.0%, the twelfth straight month of double-digit growth. Fasteners again saw strong growth at 9.1% y/y. Based on FDI data and other research inputs; we expect continued strength in public industrial distributor growth during 2018, with Fastenal y/y daily sales growth expected to remain in the double-digits through yearend.

Risk Synopsis

Fastenal: Risks include economic sensitivity, pricing power, relatively high valuation, secular gross margin pressures, success of vending and on-site initiatives, and ability to sustain historical growth.

Industrial Distribution: Risks include economic sensitivity, pricing power, online pressure/competitive threats, global sourcing, and exposure to durable goods manufacturing.
Fastener Distribution Trends: May 2018

5-Month Outlook - May

- Higher: 50%
- Same: 43%
- Lower: 7%

FDI and Pricing are diffusion indexes. A reading above 50 suggests the category outperformed expectations, while a reading below 50 suggests the category underperformed expectations.

Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. Neutral (N) - Expected to perform in line with the broader U.S. equity market over the next 12 months. Underperform (U) - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. A - Average Risk – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. H - Higher Risk – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. S - Speculative Risk – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

Distribution of Investment Ratings. As of May 31, 2018, Baird U.S. Equity Research covered 686 companies, with 59% rated Outperform/Buy, 40% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 12% of Outperform/Buy-rated and 6% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.
Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird’s internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.
