BB&TCM Fastener Distribution Index (FDI) - August Reflects Tough Environment

KEY TAKEAWAY

The FDI is a monthly survey of NorAm fastener distributors that aims to provide insight into current trends/outlooks. As a diffusion index, readings above 50 signal strength and below 50 signal weakness. For the second consecutive month, the seasonally adjusted August FDI fell below 50 (46.7), which we believe is consistent with the tough current environment for many distributors. Added contraction was driven by weaker sales sentiment and a material decline in perceived customer inventories. We believe the lower customer inventory reading is also consistent with the recent pullback in new orders among national manufacturers. Pricing, employment, and supplier deliveries were largely unchanged, while the long-term outlook for industry sentiment ticked modestly lower. Overall, we believe that fastener distributors continue to face material demand pressure from lower commodity prices, forex, and weaker industrial production. We maintain our cautious outlook on the industry, but will continue to watch for signs of more material long-term improvement.

KEY POINTS

About the Fastener Distributor Index (FDI). The FDI is a monthly survey of NorAm fastener distributors, conducted with the FCH Sourcing Network and the National Fastener Distributors Association. It offers insights into current industry trends/outlooks. As a diffusion index, figures above 50 signal strength, while readings below 50 signal weakness. It should be directly relevant to Fastenal and broadly relevant to other distributors (W.W. Grainger, MSC Industrial).

Weaker sales trends continue. For August, the FDI fell below 50 (46.7) for the second consecutive month. Of the items measured (sales, employment, delivery times, inventories, customer inventories), we believe weaker top-line sentiment remains the most directionally accurate indicator in the Index. Nearly 68% of total respondents reported sequentially flat or lower sales for August. In our view, the results are consistent with sluggish recent growth from Fastenal (+1.6% yr/yr in August versus a five year average of +13.2%), Grainger (-1% in July versus FY'15 guide of 0%-2%), and MSC (company estimated +2.2% in June versus +7.6% last year).

Reduced customer inventories also impact Index results. The sequential Index decline was also partially due to 45% of participants reporting customer inventories as “too low” (21% last month). We believe the decline reflects tightening inventories among manufacturers and reduced overall end market demand. The reading is also consistent, in our view, with materially slower recent growth in the ISM New Order Index, which totaled 51.7 in August, versus 56.5 last month (ISM).

Pricing environment largely stagnant. Point-of-sale pricing for August was unchanged versus July for 73% of survey participants. We believe the overall environment for price increases remains notably soft given material demand pressure (declining commodity prices, forex, weaker industrial production) and minimal inflation. Additionally, we view the survey results as largely consistent with recent Grainger price adjustments (-1% in Q2’15) and FY’15 guidance (also -1%). Monthly data for employment and supplier deliveries was also largely unchanged versus July.

What does this mean for public distributors? In our view, the data reflects overall weakness within the domestic economy, and 2015 has proven difficult thus far for many industrial distributors. We believe lower energy spending is at the root of weaker sales, with currency woes further compounding the slowdown. To the positive, recent conversations with private industry contacts suggest a modest uptick in manufacturing demand for the latter portion of FY’15 (45% of Index respondents expect stronger conditions six months from now). We will continue to watch for signs of more material long-term improvement. For now, however, we expect announced August sales for Grainger (9/14) to reflect ongoing weakness in the overall environment.

6-Month Outlook - August

Higher: 45% | Same: 27% | Lower: 27%

FDI and Pricing are diffusion indexes. A reading above 50 suggests the category outperformed expectations, while a reading below 50 suggests the category underperformed expectations.

IMPORTANT DISCLOSURES

Price Chart

Rating and Price Target History for: Fastenal Company (FAST) as of 09-04-2015

Rating and Price Target History for: W.W. Grainger, Inc. (GWW) as of 09-04-2015

Rating and Price Target History for: MSC Industrial Direct Co., Inc. (MSM) as of 09-04-2015

BB&T Capital Markets rating distribution by percentage (as of September 8, 2015):

All companies under coverage: All companies under coverage to which it has provided investment banking services in the previous 12 months:

Buy (1) 46.51% Buy (1) 25.71%

Hold (2) 53.16% Hold (2) 20.00%

Underweight/Sell (3) 0.33% Underweight/Sell (3) 0.00%

Not Rated (NR) 0.00% Not Rated (NR) 0.00%
BB&T Capital Markets Equity Research Department Stock Rating System consists of three separate ratings. The appropriate rating is determined by a stock’s estimated 12-month total return potential, which consists of the percentage price change to the 12-month price target and the current yield on anticipated dividends. A 12-month price target is the analyst’s best estimate of the market price of the stock in 12 months. A 12-month price target is highly subjective and the result of numerous assumptions, including company, industry, and market fundamentals, both on an absolute and relative basis, as well as investor sentiment, which can be highly volatile.

The definition of each rating is as follows:

Buy (1): estimated total return potential greater than or equal to 10%, Hold (2): estimated total return potential greater than or equal to 0% and less than 10%, Underweight (3): estimated total return potential less than 0%

Stocks rated Buy (1) are required to have a published 12-month price target, while it is not required on stocks rated Hold (2) and Underweight (3).

BB&T Capital Markets Equity Research Disclosures as of September 8, 2015
BB&T Capital Markets makes a market in the securities of Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc.
BB&T Capital Markets expects to receive or intends to seek compensation for investment banking services from Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc. in the next three months.
An affiliate of BB&T Capital Markets received compensation from W.W. Grainger, Inc. for products or services other than investment banking services during the past 12 months. The analyst or employees of BB&T Capital Markets with the ability to influence the substance of this report know or have reason to know the foregoing facts.

ADDITIONAL INFORMATION AVAILABLE UPON REQUEST
For valuation methodology and related risk factors on Buy (1)–rated stocks, please refer to the body text of this report or to individual reports on any covered companies referenced in this report.
The analyst(s) principally responsible for preparation of this report received compensation that is based upon many factors, including the firm’s overall investment banking revenue.

Analyst Certification
The analyst(s) principally responsible for the preparation of this research report certify that the views expressed in this research report accurately reflect his/her (their) personal views about the subject security(ies) or issuer(s) and that his/her (their) compensation was not, is not, or will not be directly or indirectly related to the specific recommendations or views contained in this research report.

OTHER DISCLOSURES
