May’s seasonally adjusted FDI reading (50.1) proved modestly higher for the third consecutive month, entering expansion territory (above 50) for the first time this year. May results benefitted from a slight uptick in sales bias among respondents, while yr/yr pricing ticked positive for the first time since December (consistent with the early movement in CPI and higher raw material pricing). While the 50+ reading is encouraging, we continue to temper our expectations for more material near-term expansion among fastener distributors. Anecdotes (both public and private) still reflect material caution (commodity dislocation, ongoing currency headwinds, mixed industrial production, etc.). We also note the outlook for survey respondents remains uncertain, with 58% still expecting unchanged or declining conditions in six months. We will continue watching closely for signs of more tangible strengthening.

**KEY POINTS**

About the Fastener Distributor Index (FDI). The FDI is a monthly survey of NorAm fastener distributors, conducted with the FCH Sourcing Network and the National Fastener Distributors Association. It offers insights into current industry trends/outlooks. As a diffusion index, figures above 50 signal strength, while readings below 50 signal weakness. It should be directly relevant to Fastenal and broadly relevant to other distributors (W.W. Grainger, MSC Industrial).

May sales see continued improvement. The seasonally adjusted May FDI (50.1) entered expansion territory for the first time this year, implying nascent stability in the overall environment. Of the items measured (sales, employment, delivery times, inventories, customer inventories), we believe top-line sentiment remains the most compelling indicator in the Index. 66% of May participants noted similar or better sequential sales growth (64% in April). Regarding customer inventories, 15% of participants viewed current levels as “too high”. We note that during the headier growth period of 2013-2014, this metric averaged 4%.

Annual pricing also sees nascent expansion. The May sequential point-of-sale pricing index remained in expansion territory (51.5) after jumping above 50 in April for the first time since June 2015. On an annual basis, the pricing index reached similar levels this month (53.0) for the first time since December 2014. According to participant commentary, higher material costs, to include inflated steel pricing (HRC steel futures +8% in May), could portend continued pricing growth near-term (Bloomberg). We believe the overall environment for pricing remains notably soft given minimal inflation, although the April CPI expansion (+50 bps sequentially) was a modest positive, nonetheless (Bureau of Labor Statistics). Last quarter, Fastenal reported fastener price deflation of 1.5%-2%.

Labor remains stagnant. Employment (51.5) was largely unchanged for May, as 91% of participants noted unchanged or reduced hiring versus the preceding month. On an absolute basis, Fastenal decreased total headcount by 91 in April, the fifth consecutive month of contraction. In Q1’16, the company reiterated its hiring freeze, excluding necessary vending/IT administration adds.

How does the FDI stack up to comparable macro indices? We believe positive FDI momentum in April/May is broadly consistent with the PMI, which has turned in 50+ readings in each of the last three months. May PMI totaled 51.3, with 12 of the 18 respective end markets surveyed reporting growth during the period (ISM). Conversely, the May Metalworking Business Index (MBI) fell further into contraction territory (45.3), marking the Index’s 14th consecutive sub-50 reading (Gardner). We believe the FDI, while certainly specialized, should retain a higher correlation to the PMI going forward.

Overall, industry sentiment remains mixed. Despite the FDI’s move into expansion territory, we believe there remains a divergence among survey respondents. As one participant noted, “May activity (bookings and shipments) was better than preceding months.” However, another noted, “Several markets still doing poorly—ag/construction equipment and oil and gas. These three may not have hit bottom yet.” Given overall uncertainty, we continue to await more consistent results.

BB&T Capital Markets rating distribution by percentage (as of June 6, 2016):

All companies under coverage: All companies under coverage to which it has provided investment banking services in the previous 12 months:

Buy (1) 44.02%  Buy (1) 28.48%
Hold (2) 52.19%  Hold (2) 16.76%
Underweight/Sell (3) 3.79%  Underweight/Sell (3) 30.77%
Not Rated (NR) 0.00%  Not Rated (NR) 0.00%
BB&T Capital Markets Ratings System:
The BB&T Capital Markets Equity Research Department Stock Rating System consists of three separate ratings. The appropriate rating is determined by a stock’s estimated 12-month total return potential, which consists of the percentage price change to the 12-month price target and the current yield on anticipated dividends. A 12-month price target is the analyst’s best estimate of the market price of the stock in 12 months. A 12-month price target is highly subjective and the result of numerous assumptions, including company, industry, and market fundamentals, both on an absolute and relative basis, as well as investor sentiment, which can be highly volatile.

The definition of each rating is as follows:
Buy (1): estimated total return potential greater than or equal to 10%, Hold (2): estimated total return potential greater than or equal to 0% and less than 10%, Underweight (3): estimated total return potential less than 0%

Stocks rated Buy (1) are required to have a published 12-month price target, while it is not required on stocks rated Hold (2) and Underweight (3).

The BB&T Capital Markets Equity Research Department REIT Rating System is determined by a stock’s total return potential relative to our current REIT sector return expectations. Our stock “relative rating” system may be explained as follows:

Buy: If the BB&TCM price target for the common stock implies a total return (price appreciation plus dividend yield) approximately 2.5 percentage points in excess of the midpoint of our REIT sector forecasts over the next 12 months, we rate the security Buy.

Hold: If the BB&TCM price target for the common stock implies a total return (price appreciation plus dividend yield) that lies within 2.5 percentage points of our REIT sector FTM forecast, either above or below, we rate the security Hold.

Underweight: If the BB&TCM price target for the common stock implies a total return (price appreciation plus dividend yield) approximately 2.5 percentage points below the midpoint of our REIT sector FTM forecast, we rate the security Underweight.

Investors should note that the percentage point spread and the midpoint of total sector returns used for our rating will likely change on occasion, based on shifts in our forecasted risk and return environment for the sector overall. The BB&TCM REIT team will revisit risk and return forecasts from time to time as macroeconomic events and relative value shifts unfold. Philosophically, we intend to maintain our distribution of Buy, Hold, and Underweight ratings regardless of the total sector return expectations, meaning: our stock-specific ratings will remain relative to the REIT sector, not an absolute total return basis.

BB&T Capital Markets Equity Research Disclosures as of June 6, 2016
BB&T Capital Markets makes a market in the securities of Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc.. BB&T Capital Markets expects to receive or intends to seek compensation for investment banking services from Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc. in the next three months. An affiliate of BB&T Capital Markets received compensation from W.W. Grainger, Inc. for products or services other than investment banking services during the past 12 months. The analyst or employees of BB&T Capital Markets with the ability to influence the substance of this report know or have reason to know the foregoing facts.

ADDITIONAL INFORMATION AVAILABLE UPON REQUEST
For valuation methodology and related risk factors on Buy (1)–rated stocks, please refer to the body text of this report or to individual reports on any covered companies referenced in this report.

The analyst(s) principally responsible for preparation of this report received compensation that is based upon many factors, including the firm’s overall investment banking revenue.

Analyst Certification
The analyst(s) principally responsible for the preparation of this research report certify that the views expressed in this research report accurately reflect his/her (their) personal views about the subject security(ies) or issuer(s) and that his/her (their) compensation was not, is not, or will not be directly or indirectly related to the specific recommendations or views contained in this research report.

OTHER DISCLOSURES
The information and statistics in this report have been obtained from sources we believe are reliable but we do not warrant their accuracy or completeness. We do not undertake to advise the reader as to changes in figures or our views. This is not a solicitation of an order to buy or sell any securities. BB&T Capital Markets, a division of BB&T Securities, LLC, member FINRA/SIPC, is a wholly owned nonbank subsidiary of BB&T Corporation. The securities sold, offered or recommended are not a deposit, not FDIC insured, not guaranteed by a bank, not guaranteed by any federal government agency and may go down in value. The opinions expressed are those of the analyst(s) and not those of BB&T Corporation or its executives.
