Fastener Distributor Index – April 2018

Written by R.W. Baird analyst David J. Manthey, CFA 5/7/18

Key Takeaway:
The seasonally adjusted FDI for April 2018 was 57.4, down modestly m/m (March 59.5) but remaining well in expansionary territory overall. Selling conditions similarly moderated with the seasonally adjusted sales index coming in at 63.0, down vs. a strong 70.1 reading in March. Qualitative commentary on market conditions was very positive regarding demand, while steel tariff impacts remain a topic of heavy discussion among respondents. The six-month outlook remains strong overall, while the Forward-Looking Indicator was down slightly m/m but still very healthy at 58.9 (vs. 59.9 in March).

Key Points:
About the Fastener Distributor Index (FDI). The FDI is a monthly survey of North American fastener distributors, conducted with the FCH Sourcing Network, the National Fastener Distributors Association, and Baird. It offers insights into current industry trends/outlooks. Similarly, the Forward-Looking Indicator (FLI) is based on a weighted average of four forward-looking inputs from the FDI survey. This indicator is designed to provide directional perspective on future expectations for fastener market conditions. As diffusion indexes, values above 50.0 signal strength, while readings below 50.0 signal weakness. Over time, results should be directly relevant to Fastenal (FAST) and broadly relevant to other industrial distributors such as W.W. Grainger (GWW) and MSC Industrial (MSM).

April FDI down slightly. The seasonally adjusted April FDI (57.4) moderated m/m vs. March’s 59.5 reading. In the April survey, 56% of respondents indicated sales were “better” relative to seasonal expectations vs. 64% in March. This produced a seasonally adjusted sales index of 63.0 (March 70.1). Pricing gains were again noted by a large majority of respondents, with 81% of respondents seeing higher prices y/y vs. 71% in March. For perspective on the strength of pricing in April – only 20% of respondents reported higher pricing at the low point in March of 2016. The resulting FDI pricing index of 89.1 (vs. March 85.7) was the highest reading in FDI survey history. Respondents continued to comment on inflationary pressures in the channel, with steel tariffs seen as likely to lead to additional supplier price increases over the near to medium-term. Regarding customer inventories, a majority of respondents continue to view inventory levels as in line with expectations (63% of responses), while 31% believe customers’ inventories are too low, and another 6% see inventory levels as too high. This was relatively consistent with March (64% in line, 32% too low, and 4% too high).

April FLI down slightly m/m. The seasonally adjusted FLI came down slightly following last month’s acceleration, registering 58.9 in April vs. 59.9 in March. The primary drivers of this modest downtick were a slightly lower 6-month outlook and employment levels. Nevertheless, at 58.9, the FLI remains well into expansionary territory and relatively consistent with averages seen across 2017 (60.9). Given solidly expansionary FDI and FLI readings, we believe market conditions are likely to remain in growth mode (albeit potentially moderating growth) in the coming months.
Manufacturing employment relatively stable with last month. Hiring sentiment was relatively stable this month among survey respondents. 19% of respondents saw higher employment levels in April relative to seasonal expectations vs. 29% in March, while another 81% saw employment as in line (March 68%). The resulting FDI Employment Index was 59.4, relatively consistent with March’s 62.5 reading (albeit modestly lower). The April US jobs report, meanwhile, was a bit mixed with +164,000 jobs added (+193,000 expected), though the unemployment rate ticked down to 3.9% (vs. 4.0% consensus). April’s gains primarily came in professional and business services, manufacturing, health care, and mining. Manufacturing employment continues to trend upwards (+24,000 jobs in April), with most of the gains coming from durable goods manufacturing (machinery +8,000, fabricated metal products +4,000). Total manufacturing jobs added over the past year now stands at +245,000. Average hours per work week for manufacturing employees increased slightly at 41.1 hours (vs. March 40.9).

April sentiment mostly positive. Commentary from respondents skewed positive overall this quarter. Several comments highlighted the current strong pace of demand, with one respondent saying, “Sales are brisk, [we’re] having a great year!” Another distributor indicated they are “struggling to keep up” with demand, and another simply said demand is “up, up, up.” Steel tariffs also remain a topic of heavy discussion in the industry. Several respondents expressed unease over the still-uncertain impacts of potential tariffs, with one saying, “Everyone [is] worried about how the tariffs on nuts are going to affect costs and [selling] prices.” We continue to see impacts from steel tariffs as likely to be net neutral to slight positively, as many distributors have historically been able to pass price increases from suppliers on to customers, while higher domestic activity levels could also be a minor positive. Importantly, quantitative survey data points to continued momentum through 2018, with 53% of respondents expecting higher activity levels over the next six months and 44% expecting similar activity.

Fastenal reported April daily sales growth of 13.4% y/y, above our 13.0% estimate and again reflecting growth in all end markets/product lines. Underlying “core” growth (excluding foreign exchange) was 12.8%, the eleventh consecutive month of double-digit growth. Fasteners again saw strong double-digit growth at 10.7% y/y. Based on FDI data and other research inputs; we expect continued strength in public industrial distributor growth during 2018, with Fastenal daily sales growth expected to sustain in the double-digits y/y.

FAST Risk Synopsis

Risks include economic sensitivity, pricing power, relatively high valuation, secular gross margin pressures, success of vending and on-site initiatives, and ability to sustain historical growth.

Industrial Distribution Risk Synopsis

Risks include economic sensitivity, pricing power, online pressure/competitive threats, global sourcing, and exposure to durable goods manufacturing.

Covered Companies Mentioned
All stock prices below are as of 5/4/2018.

Fastenal Company (FAST-$50.44-Outperform)
W.W. Grainger Inc. (GWW-$283.91-Outperform)
MSC Industrial Direct Co. Inc (MSM-$89.30-Neutral)
(See recent research reports for more information)
Robert W. Baird & Co. Incorporated makes a market in the securities of FAST, GWW, and MSM.

Robert W. Baird & Co. Incorporated and/or its affiliates have been compensated by Fastenal Company for non-investment banking-securities related services in the past 12 months.

Robert W. Baird & Co. Incorporated and/or its affiliates have been compensated by MSC Industrial Direct Co., Inc. for non-investment banking-securities related services in the past 12 months.

Robert W. Baird & Co. Incorporated (“Baird”) and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months. Baird may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. Neutral (N) - Expected to perform in line with the broader U.S. equity market over the next 12 months. Underperform (U) - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. A - Average Risk – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. H - Higher Risk – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. S - Speculative Risk – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

Distribution of Investment Ratings. As of April 30, 2018, Baird U.S. Equity Research covered 688 companies, with 59% rated Outperform/Buy, 40% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 12% of Outperform/Buy-rated and 6% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.
Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

Other Disclosures

The information and rating included in this report represent the research analyst's views based on a time horizon of 12 months, as described above, unless otherwise stated. In our standard company-specific research reports, the subject company may be designated as a “Fresh Pick”, representing that the research analyst believes the company to be a high-conviction investment idea based on a subjective review of one or more fundamental or quantitative factors until an expiration date specified by the analyst but not to exceed nine months. The Fresh Pick designation and specified expiration date will be displayed in standard company-specific research reports on the company until the occurrence of the expiration date or such time as the analyst removes the Fresh Pick designation from the company in a subsequent, standard company-specific research report. The research analyst(s) named in this report may, at times and at the request of clients or their Baird representatives, provide particular investment perspectives or trading strategies based primarily on the analyst's understanding of the individual client's objectives. These perspectives or trading strategies generally are responsive to client inquiries and based on criteria the research analyst considers relevant to the client. As such, these perspectives and strategies may differ from the research analyst's views contained in this report.

Baird and/or its affiliates may provide to certain clients additional or research supplemental products or services, such as outlooks, commentaries and other detailed analyses, which focus on covered stocks, companies, industries or sectors. Not all clients who receive our standard company-specific research reports are eligible to receive these additional or supplemental products or services. Baird determines in its sole discretion the clients who will receive additional or supplemental products or services, in light of various factors including the size and scope of the client relationships. These additional or supplemental products or services may feature different analytical or research techniques and information than are contained in Baird’s standard research reports. Any ratings and recommendations contained in such additional or research supplemental products are consistent with the research analyst's ratings and recommendations contained in more broadly disseminated standard research reports. Baird research analysts may provide incremental data points or views regarding covered companies in the form of Research Posts and Flash Reports. All Posts and Flash Reports are available to clients via https://bol.rwbaird.com/Login, but not all are sent directly to clients. Baird Associates may, at their discretion, choose
whether to send these Posts and Flash Reports to Baird clients after they are posted online. Such decisions are based on, among other things, client interest, coverage, stock ownership and indicated email preferences. The incremental content and/or analysis contained in these pieces may be useful to investors as part of a broader investment thesis, but is not sufficient to warrant a change in the research analyst's published opinion, including rating, estimates and price targets.
