

At Beacon, we understand that inventory management takes careful planning, forecasting, and time to be successful. Let Beacon simplify your supply chain by streamlining your procurement process so you can be more efficient and profitable. By learning how your organization operates, we will customize a **VMI Support Program** to meet your unique requirements.

- ❖ Reduce your cost of carrying inventory and see faster inventory turns!
- ❖ Improved fill rates and product availability means fewer stock outs and shortages!
- ❖ Lower your administration costs so you can focus your time on other value added tasks!
- ❖ Increase your profitability through efficient product flow and measurable cost savings!

THE PARTNER TO WORLD CLASS VMI DISTRIBUTORS

VMI Support Program

Beacon supports your VMI programs by creating an inventory management plan that is specific to your demand through the sharing of information. Your parts will be in stock and available when needed.

- Greater responsiveness to your customers, higher fill rates, and faster inventory turns
- Receive the best overall value for our products and services
- Reduce procurement costs with contract pricing and improved product availability
- A strong and mutually successful partnership
