BB&TCM’s Fastener Distributor Index (FDI) - February Backslides a Bit

KEY TAKEAWAY
Driven again by the sales component, February eased back toward slow/no growth after what was a resurgent January. This is not too surprising to us - January had a much easier comparison against December - and a modest growth environment hardly seems like an unlikely endgame. The oddity is that it diverged from the broad PMI, which improved further in February. We are not sure what this means, but distributor DSRs and the March reading should shed some light. Our supplemental question held more evidence than we might have expected of the potential for MSC Industrial in its purchase of BDNA.

KEY POINTS
About the Fastener Distributor Index (FDI). The FDI is a monthly survey of NorAm fastener distributors, conducted with the FCH Sourcing Network, which offers insights into current trends/outlooks. As a diffusion index, figures above 50 signal strength and below 50 signal weakness. It should be directly relevant to Fastenal and broadly relevant to other distributors (W.W. Grainger, MSC Industrial).

February (48.7, vs. 56.9 in Jan.) raises questions. After a resurgent January, February skidded to levels that question the strength of the early 2013 bounce. The main mover, again, was sales (48.7, vs. 82.8 in Jan.) which returned to slow/no growth mode. Other components were stable.

Retracing from January's robust, comp-aided reading is not surprising, nor is it a stretch to think underlying demand is growing sluggishly. But why did the FDI diverge from the PMI, which improved in February? Distributor DSRs and March readings should be telling.

The January Outlook loses a bit of momentum. Euphoria about the future also seems to have tempered some. Optimists (38% see activity higher in six months) still handily outpace pessimists (10%), but not by nearly as much as February when optimists were 62% of respondents and pessimists 7%. Mostly the camp seeing things being the "same" swelled, to 51% of the total. This still ranks as a good reading, but definitely more cautious and guarded than we have seen of late.

Pricing: settling in at mind-numbingly marginal. After a hopeful January, February sequential pricing settled back toward the no change level. Higher year-over-year pricing is still the norm, but at this point it seems to be in the very low single digit zone. Any apparent improvement seems to have been nothing but a feint, as pricing in the fastener industry remains largely directionless.

Supplemental query: What impact might MSC buying Barnes Distribution have? MSC Industrial has sought ways to access fasteners, and BDNA would seem to provide that entree. But what did respondents think? Most did not think much: 36% imagined MSC would be more competitive in fasteners, but 64% did not see much impact on the market. However, even in this there is a cautionary tale for smaller distributors. Of the distributors who imagined no impact, 76% based this on never having run into Barnes, not MSC's inability to tackle the model. But one of the things MSC brings to the transaction is a wider reach. It still has to prove it can be effective in fasteners, but this suggests to us there is a real geographic opportunity.

BB&T Capital Markets Ratings System:
The BB&T Capital Markets Equity Research Department Stock Rating System consists of three separate ratings. The appropriate rating is determined by a stock’s estimated 12-month total return potential, which consists of the percentage price change to the 12-month price target and the current yield on anticipated dividends. A 12-month price target is the analyst’s best estimate of the market price of the stock in 12 months. A 12-month price target is highly subjective and the result of numerous assumptions, including company, industry, and market fundamentals, both on an absolute and relative basis, as well as investor sentiment, which can be highly volatile.

The definition of each rating is as follows:
Buy (1): estimated total return potential greater than or equal to 10%, Hold (2): estimated total return potential greater than or equal to 0% and less than 10%, Underweight (3): estimated total return potential less than 0%

Stocks rated Buy (1) are required to have a published 12-month price target, while it is not required on stocks rated Hold (2) and Underweight (3).

BB&T Capital Markets Equity Research Disclosures as of March 5, 2013
BB&T Capital Markets makes a market in the securities of Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc..
BB&T Capital Markets expects to receive or intends to seek compensation for investment banking services from Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc. in the next three months.
An affiliate of BB&T Capital Markets received compensation from W.W. Grainger, Inc. for products or services other than investment banking services during the past 12 months. The analyst or employees of BB&T Capital Markets with the ability to influence the substance of this report know or have reason to know the foregoing facts.

ADDITIONAL INFORMATION AVAILABLE UPON REQUEST
For valuation methodology and related risk factors on Buy (1)–rated stocks, please refer to the body text of this report or to individual reports on any covered companies referenced in this report.

The analyst(s) principally responsible for preparation of this report received compensation that is based upon many factors, including the firm’s overall investment banking revenue.

Analyst Certification
The analyst(s) principally responsible for the preparation of this research report certify that the views expressed in this research report accurately reflect his/her (their) personal views about the subject security(ies) or issuer(s) and that his/her (their) compensation was not, is not, or will not be directly or indirectly related to the specific recommendations or views contained in this research report.

OTHER DISCLOSURES
