BB&T's Fastener Distributor Index (FDI) - Not Much Going On in June (Again)

**KEY TAKEAWAY**

Overall, we would characterize June as a bit of a step back. The overall temperature of the June FDI was not substantively changed from May, but at the margin results seem more apathetic than hopeful. Sales was the weakest component in June. Many of May’s optimists fled to the “same” camp. A window for price hikes seems to have closed, though gains the last few months seem to have stuck. So the sluggish-but-growing environment is intact, but the favorable signs we have tried to discern the last couple months tempered. In terms of upcoming industrial distributor earnings, we suspect top line results will be in-line with (Grainger) to slightly below (Fastenal, MSC Industrial) our models with a still cautious tone.

**KEY POINTS**

**About the Fastener Distributor Index (FDI).** The FDI is a monthly survey of NorAm fastener distributors, conducted with the FCH Sourcing Network. It offers insights into current trends/outlooks. As a diffusion index, figures above 50 signal strength and below 50 signal weakness. It should be directly relevant to Fastenal and broadly relevant to other distributors (W.W. Grainger, MSC Industrial).

June FDI: at 51.3, just not much happening. As in the last few months, the FDI changed technically (worse) but not substantively. June's 51.3 was a bit worse than May's 52.4, but that continues to point to sluggish-but-positive growth. The lower figure in June was driven by sales (50, vs. 63.9 in May), where those with better-than-expected results matched those with worse. This was only partly offset by supplier deliveries, which slowed (60.7, vs. 51.4 in May). Customer inventories remain low. Substantively, June feels similar to May (which felt similar to April which felt similar to March). The YTD average for the FDI is 52.3, which is representative of growth, but not much of it. There is not much going on in fastener distribution.

Outlook: apathy settles in. In June, the ratio of respondents that were optimistic declined (28.6%, vs. 47.2% in May). This still hugely outnumbers the ratio of those that were pessimistic (14.3%, vs. 16.7% in May). The outlook component is still on-balance favorable about the next six months. What was notable in June was the apathy: with many optimists in May are now seeing no change over six months, those answering “Same” were 57% of the sample, the highest we have seen.

Price: any gains were held, but not built on. Positive pricing signals reversed in June, with those reporting sequential gains slipping (48.2, vs. 56.9 in May). If there was an early year push to capture a bit of pricing, it seems to have run its course. Conversely, it seems to have stuck: those with positive annual pricing remain high (58.9, vs. 65.3 in May), and the increase remained in a 1%-2% range. In all likelihood we have seen an early-year window to enact some annual price hikes, and those appear to have stuck. But the overall pricing environment remains tepid.

What does this mean for other distributors? June activity does not look likely to bail out what have been softer results in April/May. Challenging conditions seem to have persisted. That seems like the probable message as industrial distributors report Q2’13 earnings. Judging by comps, it seems possible sales results will be mildly disappointing for Fastenal and MSC Industrial (the quarter end for which was May), while Grainger is likely to be in-line.

BB&T Capital Markets rating distribution by percentage (as of July 5, 2013):

- **All companies under coverage** to which it has provided investment banking services in the previous 12 months:
  - Buy (1) 47.50%
  - Hold (2) 51.88%
  - Underweight/Sell (3) 0.62%
  - Not Rated (NR) 0.00%

- **All companies under coverage**:
  - Buy (1) 20.39%
  - Hold (2) 7.23%
  - Underweight/Sell (3) 0.00%
  - Not Rated (NR) 0.00%
BB&T Capital Markets Ratings System:
The BB&T Capital Markets Equity Research Department Stock Rating System consists of three separate ratings. The appropriate rating is determined by a stock's estimated 12-month total return potential, which consists of the percentage price change to the 12-month price target and the current yield on anticipated dividends. A 12-month price target is the analyst's best estimate of the market price of the stock in 12 months. A 12-month price target is highly subjective and the result of numerous assumptions, including company, industry, and market fundamentals, both on an absolute and relative basis, as well as investor sentiment, which can be highly volatile.

The definition of each rating is as follows:
Buy (1): estimated total return potential greater than or equal to 10%,
Hold (2): estimated total return potential greater than or equal to 0% and less than 10%,
Underweight (3): estimated total return potential less than 0%

B: Buy
H: Hold
UW: Underweight
NR: Not Rated
NA: Not Applicable
NM: Not Meaningful
SP: Suspended

Stocks rated Buy (1) are required to have a published 12-month price target, while it is not required on stocks rated Hold (2) and Underweight (3).

BB&T Capital Markets Equity Research Disclosures as of July 5, 2013
BB&T Capital Markets makes a market in the securities of Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc.

BB&T Capital Markets expects to receive or intends to seek compensation for investment banking services from Fastenal Company, W.W. Grainger, Inc. and MSC Industrial Direct Co., Inc. in the next three months.

An affiliate of BB&T Capital Markets received compensation from W.W. Grainger, Inc. for products or services other than investment banking services during the past 12 months. The analyst or employees of BB&T Capital Markets with the ability to influence the substance of this report know or have reason to know the foregoing facts.

ADDITIONAL INFORMATION AVAILABLE UPON REQUEST
For valuation methodology and related risk factors on Buy (1)–rated stocks, please refer to the body text of this report or to individual reports on any covered companies referenced in this report.

The analyst(s) principally responsible for preparation of this report received compensation that is based upon many factors, including the firm's overall investment banking revenue.

Analyst Certification
The analyst(s) principally responsible for the preparation of this research report certify that the views expressed in this research report accurately reflect his/her (their) personal views about the subject security(ies) or issuer(s) and that his/her (their) compensation was not, is not, or will not be directly or indirectly related to the specific recommendations or views contained in this research report.

OTHER DISCLOSURES
The information and statistics in this report have been obtained from sources we believe are reliable but we do not warrant their accuracy or completeness. We do not undertake to advise the reader as to changes in figures or our views. This is not a solicitation of an order to buy or sell any securities.

BB&T Capital Markets, a division of BB&T Securities, LLC, member FINRA/SIPC, is a wholly owned nonbank subsidiary of BB&T Corporation. The securities sold, offered or recommended are not a deposit, not FDIC insured, not guaranteed by a bank, not guaranteed by any federal government agency and may go down in value.

The opinions expressed are those of the analyst(s) and not those of BB&T Corporation or its executives.
