Rotor Clip Company, Inc. is a manufacturer of a full line of retaining rings, spiral rings, wave springs and hose clamps to inch, DIN, ANSI metric and JIS standards. It is headquartered in Somerset, New Jersey, and sells its products through a network of sales representatives and distributors worldwide. Today, the company is a worldwide leader in the market.

Rotor Clip has realized significant growth over the past few years and expanded to become a global entity with a manufacturing facility in the Czech Republic, a warehouse/distribution center in England, and field offices in Germany and China. Rotor Clip is also established as a quality entity throughout the world by securing certifications to ISO/TS 16949 and ISO 9001, as well as receiving numerous quality awards from major OEMs, automotive manufacturers and distributors.

The Somerset facility occupies 238,000 square feet on 64 acres, along with an additional warehouse off campus. Processes are conducted in house ensuring the quality and reliability of the products produced, as well as lot traceability. These processes include engineering, which designs the tooling required to produce retaining rings, tool and die making, stamping and wire forming, laser cutting, heat treating, post-finishing, packaging, warehousing and shipping.
